Zero Distance Management

Zero Distance Management is a new business style made possible by Panasonic network cameras. It allows safe, smooth, economical business management that is totally free from conventional distance and time limitations.

System Diagram

The PoE function supplies power through an Ethernet cable*. DDNS service and UPnP compatibility make it easy for anybody to set up and use the system over the Internet.

*An optional AC adaptor can also be used.

Achieving Zero Distance Management with a Variety of Functions

Capture

Megapixel Cameras

Mega pixel and higher image quality

Resolution has been improved to 1280 x 960 pixels, enabling rendering of finer detail. VGA (Video Graphics Array) quality has also been improved.

Megapixel image quality comparison of new and existing models

New model: BB-HCM735 (VGA)

2x2 Pixel Binning

2 x 2 pixel binning treats four adjacent pixels as one virtual pixel, thereby increasing camera sensitivity, and improving viewability in low light conditions

4-pixel summation function

*This function cannot be used with 1280 x 960 display resolution.
*The ON/OFF setting of this function is fixed and cannot be switched over automatically.

Control

EX Zoom

Although not equipped with optical zoom, these models have an EX Zoom [EX is supposed to stand for "excellence"] function. This allows high image quality during VGA (Video Graphic Array) display with the use of 1280 x 960 pixel image.

Connect

Data transmission / H.264 adopted

The adoption of H.264/ACV has enabled reduction of data volume by more than 30% compared to MPEG-4 when transmitting data of the same image quality.

Installation

Enhanced waterproof performance

BB-HCM735 can be directly installed onto any outdoor walls. Wider choice of outdoor installation location (formerly limited to space under the eaves, etc.) expands its scope of application, catering better to users' needs.

* When the camera is installed according to the instructions provided in the included documentation, and the camera has been properly waterproofed.

Connector cover and cable guard provide protection against wind and rain to ensure uninterrupted signal transfer.

		Network Interface	Ethernet (10Base-T / 100Base-TX)		
		External I/O Connector	Input: 2, output: 1		
		Video Output*5	Analog composite (NTSC/PAL)		
		Audio Output*5	3.5 mm stereo mini jack (output is mono)		
		External Microphone Input	3.5 mm mini jack		
		SD Memory Card Slot	Full size		

*1 except H.264
*2 Frame rate may decrease in the following situations: - When buffering images - When using color night view mode - When Analog Video Output is set to [Enable] - When many users are viewing camera images
*3 30 frames/second is not possible when viewing MJPEG images at 1280 x 960 resolution.
*4 The camera supports PoP Before SMTP Authentication and SMTP Authentication, PLAIN, LOGIN, and CRAM-MD5 SMTP Authentication are supported. SSL supports SMTP over SSL. STARTTLS is not supported.
*5 Use only the included Audio/Video Cable when connecting an external microphone, speaker or TV.
